Full-stack developer with hands-on experience in C# and Android development. Collaborative and independent problem-solver with a strong ability to learn and apply new technologies. Passionate about web development with a particular interest in integrating AI, looking for an opportunity to contribute my skills to a challenging and collaborative development environment.

Professional Experience

Full-Stack Developer - Commit, 2024-present

- Built a custom video calling system using Android's MediaCodec API to offload video processing to the GPU, significantly improving runtime performance and responsiveness.
- Developed end-to-end client-side components of a cross-platform communication app as the sole developer responsible for delivering production-ready features.
- Learned C# and .NET MAUI from scratch to implement key functionalities such as audio/video calling and contact management.

Tank Commander – IDF Armored Corps, 2016-2019

- Led soldiers through comprehensive physical and professional training programs, ensuring operational readiness under pressure.
- Built strong teamwork and decision-making skills in dynamic and challenging environments.

Projects

Cooksmith AI – Side Project, 2025-present

- An AI-powered recipe platform that enables users to create, edit, and share recipes through a rich conversational interface.
- Implemented an AI-assisted recipe creation flow using the Vercel AI SDK and OpenAI API, including a Tiptap editor for text editing with real-time suggestions.
 - Developed an intelligent, real-time search engine with AI-powered RAG to help users perform semantic searches based on ingredients or cooking techniques.

SpaceEase – Side Project, 2024 | GitHub: [space-ease](https://github.com/royamit1/space-ease)

- A full-stack web application that connects parking spot owners with drivers, providing real-time parking availability.
- Built a responsive, user-friendly interface with React, Next.js, and TypeScript. The backend APIs were powered by Supabase and PostgreSQL, enabling real-time updates.
 - Managed the full deployment lifecycle and documented the development process in a blog.

Education

B.Sc. in Computer Science
Bar Ilan University (2021–2024)

Graduated with a GPA of 85, with strong performance in core courses including Data Structures (94) and Algorithms (92).

Skills

Programming Languages: C#, TypeScript, Java, JavaScript.

Technologies: React, Next.js, .NET MAUI, Node.js.

Database & ORM: PostgreSQL, Drizzle ORM, Supabase.

Tools: GitHub, Jira, Vercel, Zustand.
